

Wednesday 23rd November 2022

Learning challenge: To write with purpose in context of a report.

Success criteria: I can include:

	Pupil	Teacher
subordinate clauses which are punctuated accurately.	✓	✓
parenthesis use.	✓	✓
detailed and cohesive paragraphs.	✓	✓
punctuated accurately.	✓	✓

A visit to Centre of Life

On Monday 21st of November, Class 5 and Class 6 went on a school trip to Centre of Life. In addition to this, we had the opportunity to learn more about space and learn how to ice skate ✓

Lovely alliteration!

The first thing we did was ice skating. My favourite part was taking pictures of my rowdy classmates. During that traumatic experience, many people fell, but very good surprisingly. It's like they had done it before. ✓

sp Afterwards, we wandered to the Brain and Creativity Zone ^{where} there was a toilet that you could drink out of! You would just pull a lever and the water come out. I would never even dare to do that, but some people did I thought I would throw up. There was a real brain and a fake brain that felt and weighed the same as a real brain. Also ↑ three circular conveyor belts that if you put something on it would go round and round.

sp Secondly, we went to the theatre ^{where} we listened to stories like firefox. There was us and another school in the theatre and the staff member had a UV light and when she moved the UV light on us our teeth were purple and our high vis jackets glowed up! There ^{were} also

different kinds of metal (Sodium copper) made the torch she was holding different colours. - it was very cool. The final part of the theatre was a drill and a sparkler the stage member put the sparkler on the drill and the drill went round and round very fast (it did not look very safe but it was.)

pscl Next was the Planetarium. There we found out that one thousand Earths equals one Jupiter, one thousand Jupiters equals one Sun, one million Earth equals one Sun and one million Suns equals one Betelgeuse. That's alot! We also learned about Orion's Ryons Belts and different stars. Some people got ^{motion} sickness since it was all on the roof but I thankfully didn't. ✓

↑ The Space Zone was one of the best because there was some holes that smelt like in the International Space Station - it was gross. Also videos that were taken in space, and a video taken of different animals and in the shape of the Earth.

Finally, Hello Vack. It was a place where you could draw the Earth or anything really. You could answer question cards like what would you say to an alien or what would help make the Earth greener and hang them on the wall.

Then we went back to school. My favourite part was the Brain Zone because it was funny that people drank out of a toilet. I learnt more things about and how our mind can trick us. ✓
